Publications, September 2017

The ten most relevant publications for the Reside application are highlighted in yellow.

For each publication, we emphasize its classification in terms of level 1 or level 2 types, according to the current Finnish classification of journals and conferences in Computer Science: level 2 is better than level 1.

N.B.: In the European Computer Science community, no distinction is usually made between the first author and the other authors. Authors are generally listed alphabetically and it should be assumed that all authors have made an essential contribution.

A Peer-reviewed scientific articles

A1 Journal articles, original research

A2 Book sections, chapters in research books (refereed)

**A3 Articles in peer-reviewed conference proceedings**

Luigia Petre’s publications

Language: Beyond the Standard”. Lecture Notes in Computer Science Vol. 1723, pp. 518-533, Springer-Verlag, October 1999 – level 1

B Scientific books (Edited Book, Conference Proceedings, or Special issues of journals)

C Non-refereed scientific articles
Luigia Petre’s publications

Technical reports at Turku Centre for Computer Science (TUCS)

**D Publications intended for professional communities**

D4 Published development or research reports or studies

**G Theses**

G2 Master’s Thesis

G4 Doctoral Dissertation
